A publication of the Texas General Land Office • George P. Bush, Commissioner

Fall Cleanup set for Saturday, Sept. 15th!

Summer is almost over, so what better way to close it out than to help clean the beaches that bore the brunt of our summer vacations?

Mark your calendar for the 32nd annual coast wide Fall Beach Cleanup on Saturday, September 15th at 30 sites along the coast. This year our fall cleanup coincides with the International Coastal Cleanup, so you'll be joining millions of people in clearing trash from beaches around the world.

Thousands of Texans from across the state will head to the beach to voluntarily pick up trash left behind on our beaches or washed ashore. Our last Adopt-A-Beach, coast wide cleanup in April attracted more than 4,900 volunteers who removed more than 40 tons of trash from Texas beaches.

Register Online!

Online volunteer registration is now open at Texas-AdoptABeach.org, or volunteers may also register at most check-in sites on September 15th between 8:30 am and 9:00 am. A list of all check-in sites is located on page 6 of this newsletter. Be sure to wear closed-toe shoes and sunscreen, bring water and wear a hat. Gloves and trash bags will be provided. A number of check-in sites provide cold drinks, hot food and fun activities for the whole

family. Contact the site coordinator for more details. 🐾

Finley White Earns Top Honor in 2018 Adopt-A-Beach Children's Art Contest

Finley White's winning artwork.

was Finley White, a 5th grader at Jacob's Well Elementary in Wimberley. High resolution images of all the winning artwork can be found at TexasAdoptA-Beach.org under the Education tab.

"This contest is a great way for young Texans to show their artistic skill and vision while learning about the natural beauty of our precious coast. Each year selecting the winners is a tough process because of the volume of creative submissions, but Finley's artwork stood out for her unique expression of a Whooping Crane in a marsh on the Texas coast," Bush said.

Finley's artwork, along with 39 runners-up, will appear on the cover of the 2019 Adopt-A-Beach calendar,

which will be distributed statewide. The artwork of all winners was on public display in the South-Central Gallery of the Texas Capitol May 22nd – 29th for all visitors to view and appreciate. The exhibit was sponsored by Texas State Representative Abel Herrero (District 34, Corpus Christi).

Finley received two round-trip coach-class tickets from United Airlines to any destination in the 48 contiguous United States, Alaska, Canada, Mexico, the Caribbean and Central America, one 7-night Caribbean cruise from Royal Caribbean International departing out of Galveston, Miami, Tampa, Ft. Lauderdale, Port Canaveral or Puerto Rico, and a class party at Schlitterbahn Waterpark in New Braunfels.

Jennifer Lewis, Finley's teacher, also received two round-trip coach-class tickets from United Airlines, and one 7-night Caribbean cruise courtesy of Royal Caribbean International. All 40 winners received a ticket to the USS Lexington in Corpus Christi, a ticket to the Houston Zoo, two all day passes to Schlitterbahn Waterpark in New Braunfels, prizes and a certificate of recognition from the Texas General Land Office, and a calendar displaying the winning artwork.

Texas Land Commissioner George P. Bush selected Finley's masterpiece from 2,480 entries submitted statewide. The annual competition encourages schoolchildren to learn more about the Texas coast and express what they have learned through their art. Open to grades K-6 across Texas, the contest motivates thousands of young artists each year. 🐾

Congratulations to the 2018 Children's Art Contest Winners!

Spring Cleanup Hauls Out 40 Tons of Trash

The Adopt-A-Beach Spring Cleanup was held on April 21st. It was a little chillier than usual, with scattered showers and high tides in a few locations, but 4,905 volunteers showed up at 25 locations to remove 79,355 pounds of trash from the Texas coastline.

"For 32 years Adopt-A-Beach volunteers have come together to pick up trash and keep Texas clean and beautiful," said Land Commissioner George P. Bush. "This spring, volunteers were not only showing their dedication to keeping our Texas beaches clean, but also helping coastal communities recover and prepare for summer tourism season. Thank you, Adopt-A-Beach volunteers, for helping keep Texas' coastline clean!"

Since 1986, more than 523,000 Adopt-A-Beach volunteers have cleaned more than 9,590 tons of trash from Texas beaches. Cigarette butts, beer cans and plastic bags are among the most common items found. But with each cleanup, plenty of odd and unusual items inevitably are reported. On Saturday, the list of weird stuff found on Texas beaches included: Easter eggs, a car bumper, message in a bottle from a Florida fisherman, refrigerator, trolling boat motor, and a gas mask.

Beach Adopters Cindy and Ken Haenel take their boat out to Sunday Beach on Matagorda Island to collect trash during the cleanup, and haul it back to shore for disposal.

The 2018 Spring Cleanup was supported by Sea-World Busch Gardens Conservation Fund, Apache Corporation, Flint Hills Resources, National Oceanic & Atmospheric Administration, National Marine Sanctuary Foundation, Murphy Oil and Exploration Company, Energy XXI Gulf Coast, Corona Del Mar Beach Properties, Trusted Senior Specialists, and in-kind donor Ocean Conservancy. 🐚

Heading to the September 15th Cleanup? Don't forget

Pick a site and register online or contact the site coordinator.

Wear sunscreen, closed-toe shoes, sunglasses and a hat.

Bring plenty of drinking water and mosquito repellent.

Check in by 9 a.m.

Do not disturb the habitat of nesting shorebirds.

We'll clean rain or shine!

For your safety, stay off the dunes.

Don't pick up hazardous materials. Avoid items such as hypodermic needles and sharp objects.

Support the Texas Coast

Show your support for the Texas coast all year long by purchasing the official Texas General Land Office Adopt-A-Beach specialty license plate. For every plate sale, the Adopt-A-Beach program receives a direct benefit that will help the program continue to grow, reduce litter on Texas beaches, and provide coastal environmental education to our youth.

The plate costs \$30 in addition to regular vehicle fees, with \$22 used to support the Texas coastline. Personalized plates are also available for an extra \$40. In addition, the cost of purchasing the plate is considered a tax-deductible donation from you. Visit txdmv.gov or your local county tax office to order your plate today.

You can also make a direct tax-deductible donation online at texasadoptabeach.org, with sponsorship levels ranging from \$25 to \$25,000 for individuals or corporations.

For more information

texasadoptabeach.org or 1.877.TXCOAST

Hold the line!

If you're ever walked on a Texas beach, chances are good you've come across remnants of derelict fishing gear. Derelict fishing gear includes nets, lines, crab/shrimp pots, and other recreational or commercial fishing equipment that has been lost, abandoned, or discarded in the marine environment. Modern gear is generally made of synthetic materials and metal, which means it can persist for a very long time in the marine environment.

Ghost fishing occurs when lost or discarded fishing gear that is no longer under a fisherman's control continues to trap and kill fish, crustaceans, marine mammals, sea turtles, and seabirds. Derelict fishing nets and traps can continue to ghost fish for years once they are lost under the water's surface.

Gillnets can continue to fish before the net breaks down, even after buoyancy is lost, and because they are made of light material, they are not easily seen by fish and other marine animals. Traps and pots are usually baited when set, so once lost, they will continue to attract fish or scavengers which may become trapped and die, forming more bait for newcomers. Larger animals are vulnerable to becoming entangled in the ropes of lost traps and pots.

An estimated one million birds and 100,000 marine mammals are killed by the ingestion of, or entanglement in, marine debris such as plastic fishing line each year, according to research from the National Oceanic and Atmospheric Association. It's a serious problem, and one that you can help fix.

WHAT YOU CAN DO Help Remove Crab Traps

Each February the Texas Parks and Wildlife Department (TPWD) organizes a crab trap removal for a two week period. You can participate in helping clear out these old crab traps at multiple locations along the coast. TPWD and other organizations will provide marked disposal facilities at various locations in each major bay system for abandoned crab traps.

Many volunteers are needed to make this program work. Volunteers are needed to collect traps in the field, unload traps at the dock, count traps as they are unloaded and help out with various jobs. Many shallow draft vessels, such as flats boats or air boats, are also needed. Larger vessels can be used to shuttle traps from the field to the collection sites. Those that do not have boats can help out at the dock or arrangements may be made to pair you up with those that have brought boats, and need assistance collecting traps.

For more information about the crab trap removal program, contact Zach Thomas at Texas Parks & Wildlife at 512-389-8448.

Recover your line

Whenever possible retrieve and properly dispose of any monofilament fishing line that you encounter. If your line becomes tangled, take the time to remove it from the environment.

Recycle

Recycle monofilament fishing line at your local tackle shop or in an outdoor PVC recycling bin posted at boat ramps and piers. If your tackle shop does not have a recycling bin, encourage them to contact John O'Connell at the Monofilament Recovery and Recycling Program by email at j-oconnell@tamu.edu or telephone at (979) 845-3854 to learn where they can get their free postage paid indoor collection bin. For information about the Monofilament Recovery and Recycling Program (MRRP), visit <http://mrrp.tamu.edu>.

Sponsor a recycling bin

Volunteers check the bins on a regular basis to collect the line and to make sure that the bin is free of other debris. When the bin is full, they send the monofilament to Pure Fishing, the parent company of Berkley, which is currently the only place that recycles used fishing line. The used monofilament is chopped up, melted down and the plastic is then used to manufacture new plastic fishing-related products like tackle boxes, spools for lines, and artificial fish habitats. It is not made into more monofilament line.

Report tangled animals

Birds and animals cannot see discarded fishing line, so it is easy for them to become tangled. Once tangled, they may starve, drown or lose a limb. If you see a marine mammal tangled in fishing line, contact the Marine Mammal Stranding Network at 1-800-9-MAMMAL. To report a nesting sea turtle, hatchlings, sea turtle eggs or an injured or dead sea turtle on the Texas coast call 1-866-TURTLE5. For other tangled animals, go to the Texas Parks and Wildlife website at www.tpwd.state.tx.us/huntwild/wild/rehab/list/ to locate a wildlife rehabilitator in your county. 🐾

This is a monofilament recycling tube. Look for them at your local marina and put your used fishing line in it. If they don't have a tube, contact John O'Connell at 979-845-3854 to sponsor one at that location.

Track Your Trash Using the Clean Swell App!

Head out to your favorite beach and use the Ocean Conservancy's Clean Swell app – instead of a data card – to easily record each item of trash you collect. Then share your effort with family and friends.

The data you collect will instantaneously upload to Ocean Conservancy's global ocean trash database. The data delivers a global snapshot of ocean trash, providing researchers and policy-makers insight to inform possible solutions.

You can download the app for free online at iTunes or the Google Play store. Just search for Clean Swell. For a demo of how to use the app, go to Ocean Conservancy's website and search for Clean Swell. It's fun! Try it out today! 🐬
